ST 54 PROFILE SHEET

A 54mm square front stair nosing which incorporates a 37mm PVC insert and a 25mm riser.

Due to the chamfered tail this profile can be fitted direct timber or over resilient floor coverings.

Not recommended for fixing into concrete as the fixing point is too close to the head of the step, cracking and breakage of the concrete is highly likely.

Drilled at 250mm spacings.

No testing has been carried out on this profile.

We recommend you seek the certifier's approval on the profile and insert colour as they all interpret the standards differently.

Finish

Standard finish is 15 micron clear anodizing.
