

ST 74 LN (long Nose) PROFILE SHEET

The ST 74 LN (long nose) clear anodised aluminium stair nosing is 75mm on the tread with a 50mm pvc insert and has a 45mm riser.

Due to the chamfered tail this profile can be fitted direct to concrete, timber or steel as well as floor coverings such as carpet (no underlay), carpet tiles and vinyl.

End Caps are NOT available.

Drilled at approximately 230mm spacings.

Suitable for internal use only.

When fitting direct to the sub floor we recommended a zig zag of adhesive to be used (Adhesive NOT supplied for a supply only)

Slip Test Rating = P4

We recommend you seek the certifier's approval on the profile and insert colour as they all interpret the standards differently.
